*If so please document weight, BMI and MUST:		
Is the patient currently eating with acknowledged risk*	Yes	No
Is this patient receiving End of Life care?	Yes	No

\*Risk feeding is the term used when a patient continues to eat and drink orally despite risks [RCSLT], 2005)

## For residents not following SLT recommendations

Please select:

Does the resident have capacity, i.e. can understand, weigh up and communicate (verbally or non-verbally) the risks of not following recommendations	Yes	No
--	-----	----

### **NB All health professionals are qualified/have a duty to assess capacity**

- If the resident has capacity, it is their right to decline the recommendations. Document your assessment and the resident's decision clearly in care plan.
- If the resident does not have capacity then the nursing home needs to make/facilitate a 'best interest' decision (involve GP if necessary).

## By sending this referral I understand:

The resident (or referrer if the resident is unable to give informed consent) understands & acknowledges that their personal information will be securely used, stored and shared in order to provide ongoing clinical care.

- The information obtained by this form will be used for the purposes of therapeutic assessment only and will not be used by any other party. For more information on how we use this data please [click here](#).
- This is not an emergency service.
- Assessments may be carried out remotely or in house, as decided by the SLT following triage of the referral.
- Incomplete referrals will be returned and may delay assessment time.
